MEDICARE ITEM NUMBERS

12306: Eligible for rebate every 24 months

- One or more fractures occurring after minimal trauma (breaking a bone after a fall from standing height or less or breaking a rib from coughing).
- Monitoring proven low bone density (Osteoporosis) from previous DEXA or CT scan with a T score of -2.5 or less.

12312: Eligible for rebate every 12 months

Prolonged glucocorticoid therapy: This is defined as:

- Commencement of a dosage of inhaled glucocorticoid equivalent to or greater than 800 micrograms beclomethasone dipropionate or budesonide per day; or
- A suprphysiological glucocorticoid dosage equivalent to or greater than 7.5 mg prednisolone in an adult taken orally per day & anticipated to last for a period of at least 4 months.
 - Conditions associated with excess glucocorticoid secretion
- Male hypogonadism: serum testosterone levels below the age matched normal range.
- Female hypogonadism: female hypogonadism lasting more than 6 months before the age of 45

12315: Eligible for rebate every 24 months

- Diagnosed with primary hyperthyroidism
 - Rheumatoid arthritis, Chronic liver disease, Chronic kidney disease
- Proven malabsorptive disorders. This is defined as :
- Malabsorption of fat, defined as faecal fat estimated at greater than 18 gm per 72 hours on a normal fat diet; or
 - Diagnosed with bowel disease with presumptive vitamin D malabsorption as indicated by a sub-normal circulating 25-hydroxyvitamin D level; or
 - Histologically proven Coeliac disease.
 - Conditions with associated thyroid excess

12321: Eligible for rebate every 12 months

- Measurement of bone density at least 12 months following a significant change in therapy, ie a change in the class of drugs rather than for a change in the dosage regimen for established low bone density.

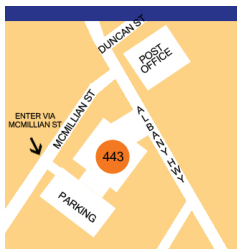

12320: Eligible for rebate every 5 years

- Patient is 70 years of age or over and not previously had bone densitometry ; or
- Patient is 70 years of age or over and the T-score for the patient's bone density at any site is ≥ -1.5 .

12322: Eligible for rebate every 24 months

- Patient is 70 years of age or over and the T-score for the patient's bone density at any site is between -1.6 and -2.4 .
